Advisory for the Farmers of Valley

In view of untimely snowfall in the valley, farmers of the valley are advised to adhere to following instructions:

1. Drain out excess water from the fields by making drainage channels/furrows.
2. Wherever transplanting of seed crops (cole and root crops) has not so far been carried out, it should be done preferably on raised beds as soon as the soil becomes workable.
3. Sowing of Garlic can be taken up as soon as the weather improves.
4. Transplanting of Onion seedlings for bulb production should be done on raised beds.
5. Wherever harvesting of second crop of potato has not been taken up, it should be done after the weather improves.
6. For protected structures (Green houses/polyhouses), remove the snow to avoid damage to the structures.
